Division

Wk 6

Essential Vocabulary – Geography

Distribution, export, trade, import, Fairtrade, subsistence agriculture, commercial agriculture, employment industry

Wk 4-6

Computing – Systems and
searching

Essential Knowledge – Geography -

I know that examples of natural resources are wood, food, water and fossil fuels. I know that fossil fuels are materials made from fossils over millions of years. Humans use fossil fuels to run cars and electrical items. I know that natural resources are unevenly distributed across the world. I know people can be employed in different industries and sectors. Trade is the process of buying and selling goods. I know that agriculture has moved from subsistence to commercial. I know that Fairtrade is a way of making sure that farmers are paid a fair price for the food they grow.
